

Portable Appliance Testing

The course forms part of the Silver Award form stage Electrician and is also available as a one day standalone course. The course will set out systems to organise the portable appliance testing of theatre electrical equipment and for theatre electricians to comply with the Electricity at Work Regulations for inspection & testing of portable appliances. The course includes visual inspection and electrical testing; testing periods; record keeping; managing the system of inspection and testing; selection of suitable testing instruments. The course also covers the use of hired equipment, examining where responsibilities lie with reference to the hire company and the hirer. Candidates will receive an ABTT CPD on completion of the course.
